

RESOURCES FOR BICYCLE SAFETY

- Use [My State Info](#) to find the information you need to know in your state about walking and biking safety under our Pedestrian and Bike Safety Section.
- [PedBikeInfo](#) center is supported by the Federal Highway Administration and National Highway Traffic Safety Administration (NHTSA) and provides information and resources around pedestrians and bicycle safety.
- The [NHTSA Bicycle Safety Page](#) raises awareness of the dangers to being a bicyclist and provides tips to keep bicyclist safe.
- [Traffic Safety Fact Sheets](#) are released annually and contain information on fatal motor vehicle traffic crashes based on data selected by NHTSA to highlight the latest developments and trend data. The most recent year of finalized data on Bicyclists and Other Cyclists is for 2020.
- The [Data Visualization Tool](#) from the National Center of Statistical Analysis presents data on vulnerable road users involved in fatal motor vehicle traffic crashes. These visualizations include dashboards with information on fatal motor vehicle traffic crashes and fatalities based on data from NHTSA's Fatality Analysis Reporting System (FARS).
- [The Safer Streets Priority Finder](#): This site enables you to analyze the risk to bicyclists and pedestrians on your community's roads.
- [Bikeability Checklist](#) is a checklist to rate your neighborhood's bikeability.
- [Transportation Safety Institute \(TSI\)](#): TSI offers free courses designed for law enforcement, program managers and stakeholders with an interest in reducing bicycle crashes and focusing on elements of bicycle safety. (Note: While the courses are free, you will need to [register](#) to sign up and then select the training from the NHTSA training topics.)
