RESOURCES FOR LAW ENFORCEMENT PROFESSIONALS

- [Law Enforcement Visor Card:](#) The Driver Orientation Screen for Cognitive Impairment (DOSCI) is a short questionnaire for law enforcement officers to screen for cognitive impairments.

- [Training Resources for Law Enforcement:](#) The Training, Research, and Education Driving Safety (TREDS) has several 30-minute training videos for law enforcement.

- [Pocket Guide: Screening & Management of Age-Related Driving Impairments](#) :This reference tool provides a brief summary of who to screen and how to report drivers with medical conditions. Also included are resources for providers and driver referral, as well as a listing of tests recommended by the American Geriatrics Society to determine driving fitness. Share with your state to adapt to their needs.

- [Law Enforcement Reporting of At-Risk Drivers](#) – AAA Foundation for Traffic Safety Driver Licensing Policies and Practices Database: This database shows each states Driver Licensing Policies and Practices affecting older and Medically- At- Risk drivers.

- [Law Enforcement: Cite and Refer Medically Impaired Drivers:](#) NHTSA provides informational videos about citing and referring medically impaired drivers.

- [Recognizing Dementia in Drivers for Law Enforcement](#): The Georgia Department of Public Health's 55+ Driver Safety Program hosted a series of pop-up presentations focused on aging road users. This is the presentation recording of "Recognizing Dementia in Drivers for Law Enforcement."

- [Pedestrian Safety Training for Law Enforcement:](#) This training is an interactive, computer-based program to help law enforcement officers understand the factors associated with pedestrian crashes develop meaningful countermeasures and enforcement strategies.

RoadSafeSeniors.org

- [Transportation Safety Institute Courses](): Offers free courses on a range of topics. (Note: While the courses are free, you will need to [register]() to sign up and then select the training from the NHTSA training topics.) The following courses are particularly relevant for older driver safety.

  - [Educating Law Enforcement Officers on Older Driver Issues]() Learn to balance public safety with the needs of all constituents, including older drivers, to improve the safety and mobility of older drivers and to demonstrate the important role citations and referrals can play in preserving this balance. This is an online self-paced course.
  - [Aging Road User Program Management](): Learn the skills necessary to manage a successful and sustainable aging road user safety program. Individuals involved with aging road user safety have specific needs that are often not met in other courses. This live online course consists of four hours of training in a one-day period.
  - [Pedestrian Safety for Law Enforcement](): This engaging and interactive course was designed with the direct involvement of law enforcement officers to broaden your knowledge of pedestrian safety and to help reduce crashes that involve pedestrians in your community. By the end of the training, you will have a better understanding of the components of pedestrian-involved crashes, crash scene investigation and reporting, and ways to partner with your community to promote pedestrian safety. This course contains five modules that you can complete at your own pace.
  - [Bicycle Safety for Law Enforcement](): This engaging and interactive course was designed with the direct involvement of law enforcement officers to broaden your knowledge of bicycle safety and to help reduce crashes in your community. By the end of the training, you will have a better understanding of the components of bicycle-involved crashes, crash scene investigation and reporting, and ways to partner with your community to promote bicycle safety. This course contains five modules that you can complete at your own pace.
  - [Motorcycle Safety for Law Enforcement](): This course is specifically geared for law enforcement officers and contains eight, online modules that you can complete at your own pace. There are also short pre- and post-assessment surveys to help you gauge how your knowledge increased during the course. This is an online course.
