

Clearinghouse for Older Road User Safety

CHORUS ODSAW Twitter Chat Discussion Prompts

In recognition of Older Driver Safety Awareness Week (ODSAW), the Clearinghouse for Older Road User Safety (ChORUS) is hosting a Twitter chat on December 5 @ 2:00 pm EST. During ODSAW, we want to empower older adults to improve their safety on America's roadways. Please join us (@roadsafeseniors) to share resources and strategies to support this goal. We will be using the following questions to guide our discussion.

1. What outreach and educational approaches have been successful in your state or organization to improve traffic safety among older adults?
2. When it comes to improving older road user safety (whether driving, bicycling, or walking), who are your partners and stakeholders for education/outreach activities?
3. When creating an age friendly community, it helps to have transportation options available. What services and options are available in your community for older adults?
4. Feeling empowered to plan for safe mobility, even beyond the driver's seat, is important for older drivers. What tips can you offer when talking to an older driver about road safety?
5. What services, programs, organizations or supports do you refer to an older adult or their family member/caregiver interested in improving their road safety?
